Skills Worksheet

## Study Guide – Ch 5

## MATCHING

In the space provided, write the letter of the term or phrase that best matches the description.

| 1. two types of consumers  | a. photosynthesis              |  |
|--|--------------------------------|--|
| 2. a diagram showing the many feeding relationships                                      | b. rabbit and coyote           |  |
| that are in an ecosystem   | c. fossil fuels                |  |
| 3. the process in which energy from the sun is used<br>by plants to make sugar molecules | d. producers                   |  |
|  | e. food web                    |  |
| 4. illustrates the loss of energy from one trophic level to the next                     | f. consumers                   |  |
| 5. organisms that get their energy by eating other                                       | g. atmospheric CO <sub>2</sub> |  |
| organisms  | h. energy pyramid              |  |
| 6. stored carbon from the remains of plants and animals that died millions of years ago  | i. algal bloom                 |  |
|  | j. atmospheric N <sub>2</sub>  |  |
| 7. organisms that make their own food  | k. food chain                  |  |
| 8. change that occurs on an abandoned farm   | l. old-field succession        |  |
| 9. a part of the carbon cycle  | m. nitrogen-fixing bacteria    |  |
| 10. results from excessive use of fertilizers  |                                |  |
| 11. organisms that transform atmosphereic nitrogen into usable nitrogen compounds        |                                |  |
| 12. part of the nitrogen cycle   |                                |  |
|  |                                |  |

## **MULTIPLE CHOICE**

In the space provided, write the letter of the term or phrase that best completes each statement or best answers each question.

\_\_\_\_\_ 13. transfer of energy from one organism to another

\_\_\_\_\_ 14. What are the first organisms to colonize any newly available area called?

- a. climax species
- b. ferns

- c. pioneer species
- d. mosses

1

| 15  | Which of the following is a producer that breaks<br>a. pioneer producer<br>b. fungal species  | s down rock?<br>c. algae<br>d. lichen                                |  |
|---|---|--|--|
| 16  | <ul><li>Humans are affecting the balance of the carbon</li><li>a. burning fossil fuels.</li><li>b. using carbonates at an alarming rate.</li></ul>  | cycle by<br>c. using fertilizers.<br>d. replanting the rain forests. |  |
| 17.   | 17. What is a pattern of change that occurs on a surface where an ecosystem has previously existed?   |  |  |
|   | <ul><li>a. primary succession</li><li>b. secondary succession</li></ul>   | <ul><li>c. tertiary succession</li><li>d. climax community</li></ul> |  |
| 18. What do deep-ocean bacteria use to make their food? |   |  |  |
|   | a. the sun  | c. carbon dioxide  |  |
|   | b. hydrogen sulfide   | d. sugar molecules   |  |
| 19  | . Which of the following is an herbivore?   |  |  |
|   | a. cow  | c. bear  |  |
|   | b. lion   | d. grass   |  |
| 20.   | 20. Which of the following is a producer?   |  |  |
|   | a. oak tree   | c. cockroach   |  |
|   | b. raccoon  | d. human   |  |
| 21  | 21. Which of the following is a process in the cell where by glucose and oxygen produce carbon dioxide, water, and energy?  |  |  |
|   | a. photosynthesis   | c. synthesis   |  |
|   | b. cellular respiration   | d. decomposition   |  |
| 22.   | 22. Which of the following organisms would be found at the top of an energy pyramid?  |  |  |
|   | a. alga   | c. leopard seal  |  |
|   | b. krill  | d. killer whale  |  |
| 23  | <ul><li>Humans usually get the phosphorus that their be<br/>a. eating plants and animals that contain phosph<br/>b. mining.</li><li>c. food additives.</li><li>d. drinking water.</li></ul> |  |  |
